

Sales Proposal for Laguna Beach and Resort

Company background

Tellurian is a leading producer of environmental remediation robots. Our mission is to help public and private actors improve the quality of their environment in order to provide healthy conditions for citizens, mitigate climate change, and restore the state of natural resources that are necessary for people and business.

Clients

Sugar Pine Ski Resort, Salmon Fishing Ltd, Diamon in the Rough Mine

Project Scope

Improve quality of sand along resort beach front, removing oil and plastic contaminants, and improve quality of water upstream of beach by removing excess nitrogen.

Proposed Products

GroundCleaner Max: part of our "GroundCleaner" product line, this large size will help purify sand and soil at scale, to restore the state of natural environment. Given the large area to clean and frequency of contamination, GroundCleaner Max is our recommended solution.

WaterCleaner Regular: part of our "WaterCleaner" product line, the medium size is most adapted to the volume of the river flowing near the resort.
